# THE PARK UNIVERSITY LIBRARY

PM PHILL MALANGA

CONCEPT STATEMENT

This Adaptive Reuse form of Historical Preservation by the Park Alumni Association aims to create a functional and modern library for Park University & the Parkville community. The Park Pirate Library will serve to provide the Parkville community with open access to technology, information, foster and promote the academic culture which is the building foundation of the Park Alumni Association. The design will incorporate natural light and smart technology making it sustainable and energy efficent.

NATURAL LIGHTING
This strategy aims at utilizing sunlight through openings.Day-lighting refers to capturing diffused light without compromising comfort and function. This strategy also enhances the quality of light, depending on the nature of the room involved & reduces the overall energy consumption.

FLEXIBLE SPACES
Designing rooms and spaces that are can adapt to multiple uses impact users by inspiring them to work independently & collaborate efficiently when need be. These spaces can be assembled flexibly according to the requirements of the event

SMART TECHNOLOGY
Smart devices create for access to digitally available information and a more convinient approach to services. Featured services include Book vending machines for faster rental drop-offs.
